Research software engineering and support - Application form

Applicant(s):
Please list the name, title, position, email address of the project applicants. Specifically,

Corresponding applicant:

Lead Principal Investigator:

(if any) Co Principal Investigators and supporting applicants:

Research Narrative (max. 500 words) Please describe your research topic and the proposed project.

Technology
Include an overview of relevant technology, platforms, programming languages for this project.
Please indicate which expertise, software or platforms are already available and which may have to be provided by the Library.

Code and/or research data

Include a brief description of your code if you already have a script available. A link to e.g. GitHub would be welcome, but is not obligatory.

If you are using any research data, please include a brief description of what kind of data you are using and whether the data are still being collected or not.

Outcomes
What are the potential products (software, analysis, datasets, etc)? How will this product accelerate your research?

References
List references cited in the proposal.
